

How Elements Form Compounds

Ionic Compounds: Made up of positive (cation) and negative (anion) ions.

Electrons get transferred from a metal to a non-metal.

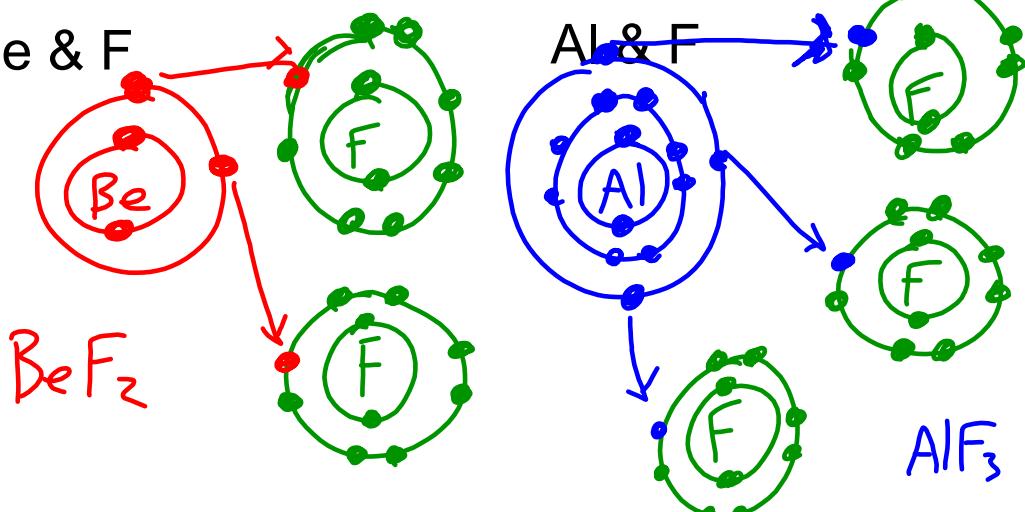

All ionic compounds have a neutral charge.

Example: Sodium + Oxygen

Mar 8-2:20 PM

Be & F

Mar 8-2:26 PM

Naming Ionic Compounds

1. Write the name of the metal, or positive ion first.
2. Follow it with the name of the negative ion with the ending switched to "ide".

N-	nitride	F-	fluoride
P-	phosphide	S-	sulfide
Cl-	chloride	Br-	bromide
I-	iodide	O-	oxide
Se-	selenide		

Mar 8-2:28 PM

Practice:

Name the following compounds:

lithium and fluorine

lithium fluoride

AlN

aluminum nitride

calcium and bromine

calcium bromide

KCl

potassium chloride

sodium and nitrogen

sodium nitride

CaF₂

calcium fluoride

Mar 8-8:12 PM

Writing Formulas for Ionic Compounds

1. Write the symbols with the positive ion first.

Example: Calcium iodide.

2. Write the ionic charge above each symbol.

3. Determine how many of each you need to balance to zero.

$$\text{Ca} = 2+ \times 1 = 2+$$

$$\text{I} = 1- \times 2 = 2-$$

4. Write the formula using subscripts to indicate the # of ions.

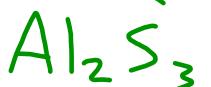

Mar 8-8:12 PM

Criss-Cross Rule

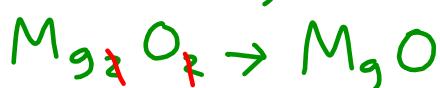

Write the ionic charges above the symbols, then criss-cross the #'s and use them as subscripts.

Example: Aluminum sulfide

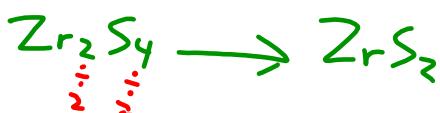

Exception: Use the minimum # of ions necessary to balance the charge.

Example: magnesium oxide.

Example: zirconium sulfide

Mar 8-8:12 PM

Practice:

Write the formula for the following compounds:

Lithium Fluoroide -

Sodium Nitride-

Potassium Oxide-

Calcium Bromide-

Magnesium Oxide-

Aluminum Sulfide-

Mar 8-8:12 PM

Atoms with only one ionic charge

Name the following compounds.

1. KCl Potassium Chloride
2. Li₂O Lithium Oxide
3. CaBr₂ Calcium Bromide
4. LiH Lithium Hydroxide
5. MgBr₂ Magnesium Bromide
6. K₂O Potassium Oxide
7. ZnO Zinc Oxide
8. SrS Strontium Sulfide
9. CaS Calcium Sulfide
10. Ag₂S Silver Sulfide

Mar 8-8:12 PM

Write formulas.

1. sodium bromide NaBr
2. calcium oxide CaO
3. silver chloride AgCl
4. silver oxide Ag_2O
5. aluminum nitride AlN
6. zinc iodide ZnI_2
7. magnesium nitride Mg_3N_2
8. calcium hydride CaH_2
9. potassium phosphide K_3P
10. calcium fluoride CaF_2

Mar 8-8:37 PM
